Annex A — BlackPool Wind-Down Allocation Schedule

Eligible supply: **24,306,720.90 BPT** across **72 wallets**. Snapshot block **24,972,000**.

`Est. USDC (Round 1)` applies each wallet's share to an **estimated** Round 1 net pool of **~128,524 USDC** and is for illustration only. Round 2 adds a further amount for wallets that claim Round 1. Final pools and per-wallet amounts are confirmed before each round and published in the reports. Allocations are computed from raw BPT balances at full precision, not the rounded share % below.

#	Address	BPT Balance	Share %
